

# Computer Programming and Database Management (CPDM)

---

## Computer Programming and Database Management (CPDM)

The Computer Programming and Database Management degree program prepares students to design, program, and administer e-business and e-commerce systems on the internet, using state-of-the-art programming languages and database technologies.

All of the CPDM courses are available online using a series of short internet-based videos. This advanced online course delivery system provides students with flexibility in completing their degree requirements. Many students continue their studies for a bachelor's degree via additional online education.

## Computer Programming and Database Management (CPDM)

All degree-seeking students must complete a First Year Experience (FYE) course as part of the first 12 credit hours taken at Cincinnati State.
