

Diagnostic Medical Sonography

Diagnostic Medical Sonography

The diagnostic medical sonographer is a highly-skilled professional who uses specialized equipment to create diagnostic images. The Diagnostic Medical Sonography program at Cincinnati State offers students the opportunity to become entry-level diagnostic medical sonographers in the specialty areas of **cardiac and vascular sonography (DMSC)** or **abdominal, obstetrics, and gynecological sonography (DMSG)**.

Program graduates earn an Associate of Applied Science degree that includes a balance of general education and sonography courses. The program also includes supervised clinical experience on site at various health care facilities in the Greater Cincinnati area.

The program is a five semester (20 months) curriculum and includes unpaid clinical experiences. Courses in this program are scheduled primarily between 8:00 a.m. and 5:00 p.m., Monday through Friday.

The program is accredited by The Commission of Accreditation of Allied Health Education Programs (www.caahep.org) (http://www.caahep.org)) 1361 Park Street, Clearwater, FL 33756, phone (727) 210-2350.

Upon successful completion of the program, graduates are eligible to take the American Registry of Diagnostic Medical Sonographers national certification examinations.
