Respiratory Care Technology (RC)

Cincinnati State offers a comprehensive program in Respiratory Care Technology. Students develop a wide range of clinical skills in traditional and nontraditional roles and gain proficiency in all areas of respiratory care, such as bedside pulmonary care, life-support systems management, diagnostic testing, pulmonary rehabilitation, and long-term care. Students practice these skills with a variety of health care professionals in the diagnosis, treatment, and education of the patient.

The Cincinnati State Respiratory Care program is fully accredited by the Commission on Accreditation for Respiratory Care (CoARC), 1248 Harwood Road, Bedford, Texas, 76021, phone (817) 282-2835, www.coarc.com.

Program graduates earn an Associate of Applied Science degree and may apply to take the credentialing exams administered by the National Board for Respiratory Care (NBRC). Candidates who pass the written and clinical simulation exams are recognized nationally as a Registered Respiratory Therapist (RRT). Eligibility for an Ohio permit as a Respiratory Therapist requires the RRT credentialing.
