

Business Management Technologies

The Business Management Technologies programs prepare students for entry-level positions in a wide range of business organizations and situations.

- Degree programs in Business Management, Marketing Management, and Paralegal include a range of courses that prepare students for professional work. Degree programs include cooperative education work experience, which provides insight on dealing with day-to-day responsibilities in business settings.
- Certificate programs in Entrepreneurship, Paralegal, and Real Estate are designed to lead to immediate employment opportunities in a shorter timeframe.
- The Business Pathways Certificate is designed for students who want to learn fundamental business concepts while also completing some of the required courses for an Associate of Applied Business degree.
