department	department code
Economics	department code ECO
Geography	department code GEO
History	department code HST
Labor Relations	department code LBR
Political Science	department code POL
Psychology	department code PSY
Sociology	department code SOC

Mathematics - 3 credits

department	department code
3 credits Mathematics	department code MAT

Students seeking an AAB, AAS, or ATS degree should consult the curriculum for their program, as published in this catalog, to determine how the general education requirements should be met.

- Individual degree programs may require students to complete program-specified general education courses, or may permit students to choose some general education elective courses.
- Transfer credit for social science or humanities courses completed at another institution, in disciplines not listed above, may be applied toward Cincinnati State graduation requirements with the program chair's permission.

Students seeking an AIS degree or an ATS degree not published in this catalog must meet general education requirements established for the specific degree program.

Program Graduation Requirements (Degree Audit Curriculum)

Requirements for each degree and certificate program at Cincinnati State are published each year in this catalog. Students are expected to fulfill the requirements in effect for the catalog year they are admitted to the program. This set of requirements may be referred to as the student's Academic Evaluation or Degree Audit curriculum.

Students readmitted to the College after an absence of one year or more are expected to fulfill the requirements in effect at the time of readmission.

In situations where coursework is five years old or older, or where requisite skills may have been lost, courses previously taken are subject to review by the program chair and dean. Those courses reviewed that do not meet current program requirements and standards will not count toward degree or certificate requirements.

Students should consult with their program chair or academic advisor to discuss any changes made to program requirements that could affect progress toward completing their degree or certificate program.
