

Healthcare Programming and Systems Analysis Major (HITPA)

Health Information Technology - Healthcare Programming and Systems Analysis Major (HITPA)

Students in the Health Information Technology - Healthcare Programming and Analysis major gain the knowledge and skills required to fulfill an essential information technology role in healthcare organizations, either as a developer who designs, implements, and maintains health-based software applications, or as an analyst supporting current healthcare-related applications.

Graduates earn an Associate of Applied Science degree. Coursework covers healthcare fundamentals as well as IT professional skills in systems analysis, software development, database design, and core technical areas including .NET, Java, HL7, SQL, and SQL Server.

For more information, please contact the Health and Public Safety Division at (513) 569-1670.
