Pre-Nutrition Science (PNS)

Pre-Nutrition Science (PNS)

The Pre-Nutrition Science program prepares students for transfer to a bachelor's degree program in nutrition science, dietetics with emphasis on business or exercise, or other dietetics-related programs. Students who complete the Pre-Nutrition Science program earn an Associate of Science degree and are well prepared to enter a four-year degree program at various institutions in the region.

The Pre-Nutrition Science program includes 105 hours of directed practice. Students are also required to complete an additional 31 hours of professional meetings, food shows, and wellness and program support activities.

Course requirements and application of transfer credits to bachelor's degree programs vary, so students should work closely with their Cincinnati State academic advisor as well as the advisor at the institution where they intend to complete a bachelor's degree.

Students who complete a bachelor's degree program are required to complete an internship before they can take the credentialing exam given by the Commission on Dietetic Registration.

For more information, please contact the Business Technologies Division at (513) 569-1620.

To apply for this program at Cincinnati State, visit the Admissions (http://www.cincinnatistate.edu/academics/admission/) section of the College website.

Some courses are offered in alternative versions identified with a letter after the course number-- for example, ENG 101 and ENG 101A.

- This curriculum displays only course numbers without the added letter.
- The alternative version, when available, meets the requirements of the course version without the added letter.

Pre-Nutrition Science (PNS)

- Access data, references, patient education materials, and consumer and other information from credible sources.
- Adhere to current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Dietetics Practice, Standards of Professional Practice, and the Code of Ethics for the Profession of Dietetics.
- Use clear and effective oral and written communication.
- Prepare and deliver sound food and nutrition presentations to a target audience.
- Demonstrate active participation, teamwork, and contributions in group settings.
- Participate in professional and community organizations.
- Participate in advocacy on local, state, or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
- Perform specific activities of the Nutrition Care Process as assigned by registered dietitian nutritionists in accordance with the Scope of Nutrition and Dietetics Practice for individuals, groups, and populations in a variety of settings.
- · Provide nutrition and lifestyle education to well populations.
- Develop nutrition education materials for disease prevention and health improvement that are culturally and age appropriate and designed for the educational level of the audience.
