

Fire Service Leadership (FSTL)

Fire Service Leadership (FSTL)

The Fire Service Leadership program provides additional knowledge and expertise for certified firefighters who are interested in furthering their careers while earning an Associate of Applied Science degree.

The scope of fire service encompasses many challenging community needs. Fire service professionals must be prepared to respond to and meet these needs. Effective leaders in today's fire service incorporate changing technologies and skills into their fire department Standard Operating Guidelines. Effective leaders also must be experts in fire behavior and safety, display decisive internal and external communication, be familiar with laws that govern Fire/EMS, and embrace diversity within the department and community.

Firefighters must have at least five years of experience prior to beginning the second year curriculum of the Fire Service Leadership program.

Students are eligible to earn advanced standing credit for industry credentials. Students who earn all possible advanced standing credit can complete the remainder of the degree program by taking online courses.

Students must earn grades of C or better in all FST classes.

Applicants must present copies of previous certifications pertaining to fire fighting and emergency medical services.

For more information, please contact the Health and Public Safety Division at (513) 569-1670.

Some courses are offered in alternative versions identified with a letter after the course number-- for example, ENG 101 and ENG 101A.

- This curriculum displays only course numbers without the added letter.
- The alternative version, when available, meets the requirements of the course version without the added letter.

The letters G, B, and T (displayed after course titles or elective descriptions) identify types of courses required by the Ohio Department of Higher Education as part of an associate's degree curriculum.

G = General Education course in this curriculum

B = Basic Skills course in this curriculum

T = Technical course in this curriculum
