

Computer Network Administration - Computer Support Major (CSA)

Computer Network Administration - Computer Support Major (CSA)

Computer Support and Administration program graduates are troubleshooters responsible for interpreting problems and providing technical support assistance and advice to customers.

Students learn to install, set up, and maintain hardware and software for microcomputers. Courses include computer operating systems, data communications, networking, and support center management. Graduates earn an Associate of Applied Science degree.

Career opportunities for program graduates are diverse, for several reasons:

- The sheer number of computers and users in business and industry creates ever-changing work environments and challenges.
- Also, gaining assistance in using software effectively is generally a high priority for businesses and users.
- Finally, the graduate's knowledge and skills are applicable to a class of computers, rather than to a particular company, so graduates have significant job mobility as well as opportunities for entrepreneurial work.

Job titles for Computer Support and Administration graduates include senior PC support technician, PC system coordinator, or helpdesk manager.
